

# Chinese DBs & VAS through CIBTC

---

Professional Library Service Provider in China

WANG Tong

Oxford, Sept. 2015

# Yearly Review - publication

- ▶ More titles, less printed copies, extend turnaround, more stocks, more returns.
- ▶ Copies for each title sold reduce, especially for expensive ones.
- ▶ The incomes of publishing houses mainly rely on printed book sales concentrated on mass market, institution & library purchase and text books. Orders from e-commerce platforms are increasing and percentage various from subjects and titles.
- ▶ Most publishers have few experiences but are interested in overseas demands, orders from abroad still emphasized on academic publishers, university publishers, and publishers who produce easy reading titles.
- ▶ Most publisher's transformation projects financed by government are focused on digitizing old titles and verifying digital copyrights, or creating individual featured collection products.

# Some Observation

## Key Issues of DBs created by publishers or producers

- ▶ Produce by publishers or give authorization to distribution platforms. Contents disappear when authorization expired without notice.
- ▶ No signed digitization authorization for old contents & complicated digital rights and limits for new titles. Some authors insist more rights or show aggressiveness.
- ▶ Limited acknowledgement for e-market, such as reader's requirements, habits, product functions, etc.
- ▶ High expectation for oversea's clients ( also means high price)
- ▶ More DBs available ( background, quality, stability, guarantee...)

# Announcements

▶ CIBTC ERP ( Enterprise Resource Planning ) system will be launched in late 2015, restructuring internal management, optimizing workflow of data processing to enhance our service quality.

▶ Staff member change:
